

## Wholesale\_Age\_of\_Inventory

This file is provided at no charge to LPs and is a summary of their current wholesale product inventories. Please see below for a list of all columns on this file and their definitions.

### Column A: Item

The BCLDB unique identifier (SKU number) for each product.

### Column B: INTERNAL\_PRODUCT\_NAME

The BCLDB internal name for each product.

### Column C: Subcategory

The BCLDB hierarchy for this product. Second level.

### Column D: Class

The BCLDB hierarchy for this product. Third level.

### Column E: Vendor Name

The vendor responsible for registering this product.

### Column F: Wholesale Lifecycle Status

The BCLDB Wholesale Lifecycle Status for each item. ACTIVE means the product is able to be ordered. PRODUCT\_EXIT means the product is being discontinued by BCLDB and can no longer be ordered. END\_OF\_LIFE is discontinued and also has zero inventory.

### Column G: Lot

The vendor created lot code for a given batch of product.

### Column H: Month Rec

The earliest month of receipt for a given lot number.

### Column I: Month Unsellable (Rec)

The unsellable month for a given lot number, based on the earliest month of receipt.

### Column J: Current Quantity

The current retail selling unit (each) inventory count for a given item and lot. Please note, this is a single snapshot which may not align perfectly with other reports due to the different systems involved and orders, holds, or returns in progress.

### Column K: Cost

The estimated cost based on current quantity multiplied by wholesale cost per retail selling unit.
